Vulcan's Aranel

CDCT Recognized show Training 2 55.208

Vulcan, a 28 year young Trakener gelding, has been and continues to be a remarkable horse. Both Vulcan and his owner were born in Ontario, Canada. Vulcan was a frequent and successful participant in CDCT dressage shows until, at the age of 21, he foundered as a result of Cushing's disease. Although his chances of survival were considered by both vet and farrier to be less than 50%, he bounced back and rapidly returned to perfect health. He is an easygoing guy and will always try his best. He continues to show and loves to go out on trail rides. I can only hope that I am in as good shape as he is when I get to be his age!
